Partner Care History

In 2010 Kelley Rice-Schild, a skilled nursing facility owner, made the decision to start a pharmacy that caters to owner's needs.

Partner Care Pharmacy was founded on drug pricing transparency.

We know one of your highest expenses is medications, and we keep it simple when it comes to pricing. In 2011 I opened Partner Care Pharmacy and never had to spend another minute trying to understand drug prices, neither will you.

"Working with Partner Care Pharmacy is a true partnership, they are everything we can ask for in a Pharmacy. From the direct line of communication with the decision makers, to the excellent customer service and extreme reliability. They alleviate our concerns in this incredibly complex service."
